

A modern kitchen and dining area featuring a large glass wall and a marble island. The kitchen has wooden cabinets, a white countertop, and a stainless steel range hood. The dining area has a wooden table and chairs. The floor is made of large, light-colored tiles. The glass wall provides a seamless connection between the indoor and outdoor spaces.

S4 Screen with invisible sill

Seamless connection from inside to outside

centor®

S4

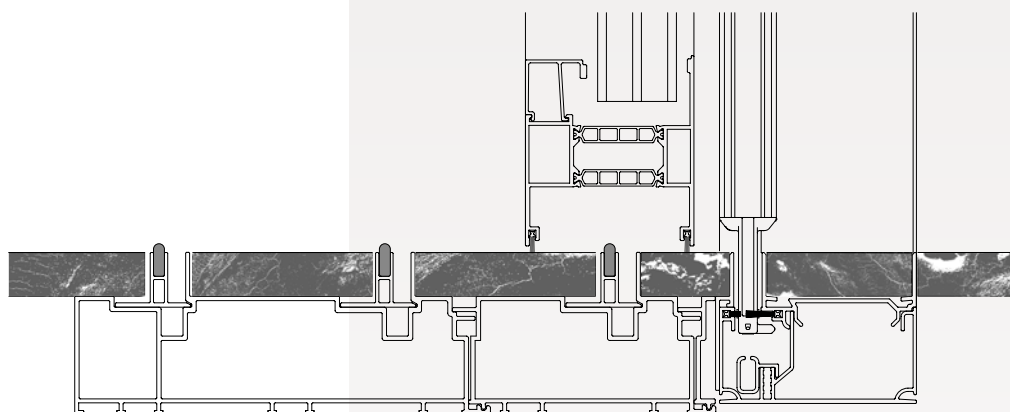

centor

The S4 Invisible sill is the ultimate solution for homeowners and designers seeking an uninterrupted flow between indoor and outdoor spaces.

By integrating floor tiles or timber directly into the sill cover, this innovation makes the sill disappear, maintaining a clean, modern look while preserving Centor's renowned screen performance.

Designed for those not wanting to compromise on style or functionality, the S4 Invisible Sill creates a true indoor-outdoor connection, aligning with global architectural trends for open, integrated living spaces.

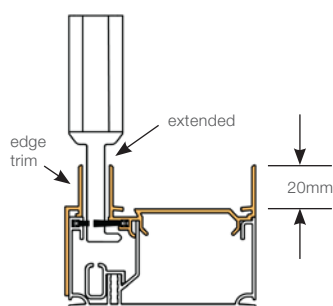

Seamlessly paired with doors featuring invisible sills, Centor's screen maintains a refined, open look while ensuring a smooth transition between spaces.

This seamless integration delivers uninterrupted views, reliable insect protection, and lasting durability—enhancing modern architectural design without compromise.

BENEFITS

The invisible sill solution being introduced by Centor includes:

- Two new sill covers that hold 20mm thick tile or wood.
- One sill cover that is the same width as the sill.
- A second wider sill cover with a 22mm overhang used to bridge the gap across the door sill. (This is normally part of the floor covering.)
- Sill covers are removable for easy maintenance and cleaning.
- The invisible sill features an edge trim that provides the tiler with a clean finishing edge and a smooth surface for the mesh to glide against, preventing sharp edges from damaging the fabric during operation.
- An extended bottom stile block that passes through the flooring to the sill.

S4 Invisible sill

CONFIGURATIONS

The invisible sill is available in the following configurations:

- Single, Double, Combo, XO and OX, Jambless XO and OX

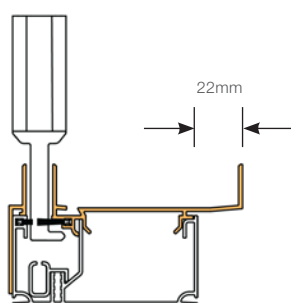

FINISHES

To withstand the rigors of grout or glue during installation and to ensure long-lasting durability, the S4 Invisible sill is only available in anodised finishes. Painted sills are NOT available.

- Available in black and natural anodised finishes.

ORDERING

The S4 Invisible Sill is available for selection in CPS upon request. When quoting S4, the sill selection is displayed with supporting graphics. Options include: Standard sill, Invisible sill, Invisible Sill with 22mm overhang
